Subject: Implementation Plan for Third West Substation Work Plan

Craig & Joyce,

Attached is Cache Valley Electric's Implementation Plan in regards to the PacifiCorp Work Plan for the Third West Substation Upgrade Project submitted June 23rd, 2011. Please review and provide comments.

Cache Valley Electric is scheduled to set up controls later this week and next week at the site. Please let us know immediately if there are major concerns with the implementation plan.

I scheduled a meeting Monday at 11:00am at the substation to walk through the plan and address any questions and concems. Joyce, we recognize you will very likely not be able to attend but wanted to keep you informed of the meeting regardless.

Sincerely,

Mike Shepherd
